

CLOUD MISCONCEPTIONS STILL PERVASIVE IN 2018

February 2018 we conducted some global research. As part of this, we asked **164 respondents in EMEA** about their experiences and attitudes when it comes to security in the cloud.

PEOPLE STILL BELIEVE ON-PREMISES SECURITY IS BETTER THAN CLOUD

57%

report their on-premises security as superior to cloud.

71%

expecting cloud security to be a responsibility that's shared with cloud vendors.

19%

think cloud vendors are solely responsible.

THE CLOUD IS REDEFINING THE ROLE OF THE FIREWALL

82%

have concerns about deploying firewalls in the cloud.

41%

say pricing and licensing not appropriate for the cloud.

39%

citing 'no centralised management creating a significant overhead'.

TRADITIONAL SECURITY REMAINS A BOTTLENECK FOR DEVOPS

Who has adopted DevOps, DevSecOps, or CI/CD (continuous integration and continuous deployment) methodologies.

63%

APAC

58%

EMEA

53%

AMERICAS

95%

of the organisations that have adopted have faced challenges integrating security into those practices.

The top challenge reported was 'limitations with existing security solutions'.

Security processes not being changed was also voted as a high scorer.
